

COVID-19 VACCINE BOOSTER UPDATE

Who should get a booster?

- Everyone ages 5 and older

Who should get a second booster?

- Everyone ages 50 and older
- Everyone ages 12 and older who has a weakened immune system

cdc.gov/coronavirus

326630-DK

CDC's current recommendations encourage certain immunocompromised individuals and people over the age of 50 who received an initial booster dose at least 4 months ago to receive another mRNA booster to increase their protection against severe disease from COVID-19. Adults who received a primary vaccine and booster dose of Johnson & Johnson's Janssen COVID-19 vaccine at least 4 months ago may now receive a second booster dose using an mRNA COVID-19 vaccine.

These updated recommendations are because of the increased risk of severe disease in people over the age of 50 or who have underlying health conditions.
